

# Windows Server 2003 Administration MCSA/ MCSE 70-290

**Duration:** 54 hours

**Course level:** Technical

**Delivery method:** Online

## Introduction

---

**IT is a fast moving industry, and new technologies are emerging all the time, so it's essential for IT professionals to keep their skills refreshed and up-to-date.**

Gaining professional accreditation is an effective way of demonstrating skill and competence.

This course provides learners with an introduction to using Microsoft Windows 2003 Server, and prepares them for the MCSE/MCSA exam 70-290: Managing and Maintaining a Windows Server 2003 Environment.

They'll learn about all aspects of managing Windows Server 2003, including licensing, installation and configuration.

## Who is the course for?

---

This course is for anyone working with Microsoft Windows 2003 Server, and/or preparing for the MCSE/MCSA exam 70-290: Managing and Maintaining a Windows Server 2003 Environment.

There are no formal entry requirements, although a good working knowledge of computers and IT is essential.

## What will you get from this course?

---

When you have completed this course you will be able to:

- Take the MCSE/MCSA exam 70-290: Managing and Maintaining a Windows Server 2003 Environment
- Install and configure Windows Server 2003
- Manage disks and server hardware
- Configure and control resource access
- Manage Terminal Services and Web services
- Use server management tools
- Monitor performance and security
